

OPEN DISCLOSURE

Cognitive Ability Testing 2021

This spring, ALL 2nd grade students will participate in a Cognitive Abilities Screener Test. Cognitive ability tests measure a student's overall ability across a broad range of mental capabilities. A Cognitive ability test is not an achievement test. Another basis for using a cognitive ability test is to assess students' reasoning and problem-solving abilities to help guide appropriate placement into the district Program for Academic Achievement and Enrichment (PACE). For more information on the PACE program please visit the district web page link <http://www.pcschools.us/index.php?page=317>

Your school's testing date is between March 22 – March 26, 2021
If you would prefer your child not be tested, please inform your child's teacher prior to the test date.

If you have a remote student, testing must be conducted in person. If you prefer your child not attend in person testing, they may be tested when they return to in person school during our regular testing blocks. If you would like to arrange for your child to test during our testing week, please contact Gina Mason at the email or number below.

If you have additional questions, please contact Gina Mason at gmason@pcschools.us or 645-5600 ext 3083.
